# Introduction

***MIK energy windows*** are informed with positive information that cleanses and harmonise the energy of air and water and are proven to ***strengthen the body***, have a ***positive influence on our well-being*** and create better quality living conditions.

## *Diseases, fatigue and indisposition can be the result of bad air in the living area.*

Today, people spend, on average, more than 80 percent of their time indoors. We are surrounded by numerous chemicals, electronic devices and appliances that contaminate the air and destroy the harmony of indoor air. **Due to bad and exhausted indoor air, we feel bad, have headaches, are less productive, have difficulties concentrating and are more prone to develop diseases.**

The air and water in the mountains are much better and much healthier than the air and water in cities and incomparably healthier than the air we breathe indoors. **High quantities of negative ions and the positive energy of air and water stimulate our body and mood.** It is for this reason that a walk in nature has such invigorating, refreshing and stimulating effects.

## Improve the harmonisation of energy in the air and water in your home and you will feel better!

We can create a quality and healthy indoor environment with no unnecessary energy losses or waste of money! With MIK energy windows you will live a healthier and better quality life. **MIK energy windows** will invigorate you, as they are enriched with information that **establishes an energy balance for people, animals and plants in the room.**

We have **verified** the **positive influence** of MIK energy windows on the well-being of people, animals and plants with **physical, biological and chemical methods.**[1] The research was led by independent experts: university professor **Dr. Peter Bukovec**, Russian physicist **Dr. Yuri Yatsko** and biologist **Peter Firbas MSc** from the laboratory of cytogenetics. All research has confirmed that **MIK energy windows have a positive effect on living organisms.**[1]

## MIK ENERGY WINDOWS

- Cleanse and harmonise the air
- Refresh the room
- Increase and prolong your ability to concentrate
- Reduce physical fatigue

1. In accordance with the results of the research: MIK info cell, Vili Poznik, Celje, August 2010; The development of MIK energy windows, Dr. Yuri Yatsko, Ljubljana, August 2012; GDV electrography of MIK energy windows, Prof. Dr. Peter Bukovec, Ljubljana, October 2010; Allium metaphysical test for the testing of drinking water, environmental samples and chemicals, Peter Firbas, BSc, Domžale, November 2010.
2. Taken from the research on GDV electrography of MIK energy windows, Prof. Dr. Peter Bukovec, Ljubljana, October 2010.
3. Taken from the research: Allium metaphysical test for the testing of drinking water, environmental samples and chemicals, Peter Firbas, BSc, Domžale, November 2010.

Reports on all research performed stated under point 1 are published on the website http://www.mik-ce.si/okna/energijska-okna/poročila-o-delovanju-in-rezultatih-raziskav/

## Advantages

The ***positive information*** and vibrations improve the harmonisation of the air, water and room and ***strengthen our energy field*** and our ***health***.

# Positive energy

## *has a positive effect on us.*

In order to be healthy, vital, happy and satisfied, **people require balance and harmony within their environment**. This occurs when our energy field is in balance and harmony. **We can achieve harmony by receiving positive energy and information.** Everything in our lives is energy; everything carries a certain vibration and vibrations can be recorded through special technology and transferred onto another object.

**In the process of informing according to the original technology of the MOP Poznik**, with the aid of an orgone cannon, i.e. an apparatus based on the use of rays, that enables the transfer of information, **we have added positive information to our products**. If we add to a light and pleasant room the positive information and vibrations carried by the MIK energy plate, we will improve the harmonisation of the room and consequently strengthen our energy field and well-being.

We have measured the effect of the MIK energy plate on the well-being of people, with the Kirlian camera that enables a visualisation of the human biofield or energy field. **The clearer the image of the biofield, the healthier and fitter the person is**, and vice versa. The clearer our biofield is, the better we feel and more immune we are to various diseases and negative influences from the environment.

**The results of measurements** of energy status changes in test persons **have proven as high as 40 percent improvement in energy parameters** in an average person. In individuals with a lot of energy, the energy parameters have increased by 20 percent, while **in the elderly and individuals with a distinct lack of energy, these have increased by as much as 100 percent.**[2]

The quality of air can be improved in various ways. By ionizing the air with ionizers or by airing out the room, we increase the number of negative ions in the air, and with energy windows we also cleanse and improve the energy of water and air in the room and harmonise the room.

When we are in harmony, our biofield is wider and we emit positive energy that influences other creatures we come into contact with.

MIK energy windows have ten times stronger and longer lasting effects on the change in energy of the water and air in the room than devices for room harmonisation.[2]

MIK energy windows are proven to improve the well-being of people by as much as 40%.[2]

The harmonisation of air and water in a room equipped with MIK energy windows is four times better than the harmonisation in a room without MIK energy windows.[2]

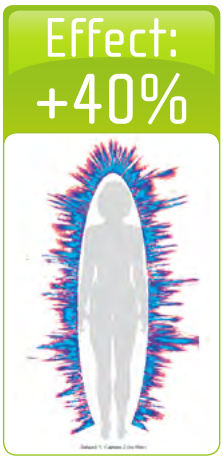
### Increasing the energy of water and air[2]

| EFFECT | Increase of water energy (%) | Increase of air energy (%) |
|---|---|---|
| Room equipped with MIK energy windows | 7,9 | 11,8 |
| Airing | 3,2 | 4,2 |
| Device for room harmonisation | 0,7 | 1,1 |

The effect of MIK energy windows, airing out and devices for air harmonisation on the energy of water and air in the room. The measurements and comparisons of the effects were performed by Prof. Dr. Peter Bukovec at the Institute for sustainable development (Inštitut za trajnostni razvoj).

| Room | EFFECT | Level of room harmonisation |
|---|---|---|
| A | Un-aired room | 1 |
| | During the operation of the device for room harmonisation | 2 *Drops when the device is stopped.* |
| | During airing out | 3 *Drops when airing out is finished.* |
| B | Room equipped with MIK energy windows | 4 *Constant* |

Energy status of a test person **before** she was exposed to the functioning of MIK energy windows.[2]



Energy status of a test person **after** she was exposed to the functioning of MIK energy windows.[2]

***MIK energy windows*** change the natural properties of water and air in the room and ***make the water*** and ***air more harmonised*** and ***healthy***.

# *MIK energy windows*

## carry positive information, harmonise the room and ***vitalize our cells***.

### MIK energy windows reduce the possibility of damage to our cells.

**The results of measurements** of the MIK energy plates' influence on human beings using the **ALLIUM biological method**, which shows the environmental effects on the growth and development of living cells in an organism, have demonstrated that in otherwise equal conditions in a room, **the number of undamaged cells in an organism that is exposed to MIK energy windows is 46 percent greater** than in those that were not exposed to positive energy. Due to the universalism of the genetic code of living organisms, the results of this research can be transferred onto humans, as the biochemical composition of the chromosomes of onions (used in the research) and humans is the same.[3]

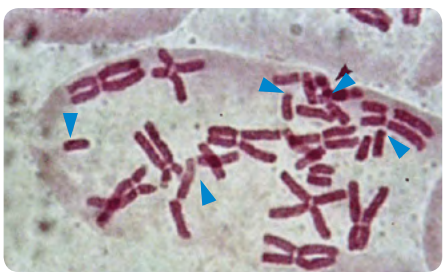
### Images of growth and development of test bulbs in the Allium test:

Growth and development of bulbs in a room **without MIK energy windows**. The number of cells with damaged chromosomes: **19%**[3]

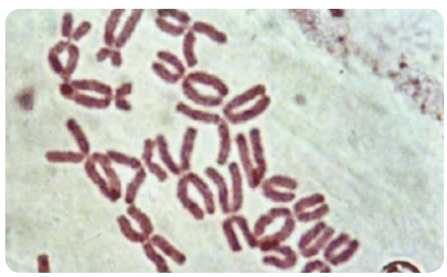
Growth and development of bulbs in a room equipped **with MIK energy windows**. The number of cells with damaged chromosomes: **10%**[3]

**The results of measurements in the ALLIUM test have also proven an obvious difference (25 percent) in the growth of organisms**, particularly in the length and strength of roots, which additionally substantiates the evidence on the quality of surrounding space and confirms that **MIK energy windows improve environment quality and have a positive effect on our health and well-being**.[3]

### Microscopic images of a damaged and undamaged cell:[3]



Damaged cell



Undamaged cell

Reports on all research performed on the functioning and effects of MIK energy windows is published in full on the website www.mik-ce.si.

The Biological Allium tests were performed my Peter Firbas, MSc, in the laboratory of plant cytogenetics, who states:

*»The quality of water in a room with MIK energy windows has improved, and the damage to chromosomes in the cells has been reduced, which proves that MIK energy windows improve the quality of the environment and have a positive effect on our health and well-being.«*

Provide for your well-being and a healthy life with abundance of energy

# *MIK energy plate*

**1 • 25 m²**

## MIK energy windows or MIK energy plates?

**MIK energy windows** only differ from other window systems in **being enriched with a special MIK energy plate** that received 300,000 selected pieces of information with a positive influence on the process of informing the plate. A MIK energy plate consists of 70% silicon, which enables the optimal transfer and storage of information entered into the plate using a special technology with Poznik medicinal equipment. Code inscriptions, i.e. information obtained with the use of orgone technology is visible on the glass. Through the glass part of the MIK energy plate, the energy passes to the inner gold-plated brass centre, in which crystals, various precious stones, quartz and $SiO_2$ particles are located. The gold-plated brass centre collects **all of the obtained energy enriched with information that positively, stimulates and influences everything that benefits living beings, emitting it into the room** through the outer Magic life circle.

## MIK energy windows function non-stop and require no additional energy for their functioning

The only factor that affects the functional power of the MIK energy plate is light. MIK energy plates that are correctly installed onto a window thus function 24 hours per day and can be installed effortlessly in rooms in which we spend the most time and want to be more active and creative. **Harmonisation of living areas, children's rooms, offices, infirmaries, hotel rooms and retirement homes will enhance the comfort in the room and increase our efficiency and productivity.**

**MIK energy plates harmonize the air in the room, creating the same properties air has in nature.** From the viewpoint of energy parameters, airing is not important. Due to the products of the human metabolism (carbon dioxide, acetone, ethanol, methanol) and the gases produced by heating and cooking (carbon monoxide, hydrocarbon, carbon dioxide), we naturally recommend airing, as well.

**For optimal efficacy of MIK energy windows, we recommend setting one MIK energy plate or one MIK energy window in a room up to 25 m² in area.** In rooms larger than 25 m², we advise that you install more MIK energy plates in accordance with the size of the room.

MIK energy plates can be installed effortlessly on built-in windows as well.

The functioning of a MIK energy plate, i.e. the programme inscribed on the MIK energy plate is activated by cosmic light; thus, a MIK energy plate should be installed on a window.

You can buy MIK energy plates that are already **installed into MIK energy windows or as a separate element** to be installed on your existing windows, regardless of the material or shape of your windows. If you are replacing your builders' joinery, we recommend that you choose MIK energy windows with MIK energy plates readily installed.

**The only factor that affects the functional power of a MIK energy plate is light.** MIK energy plates thus **function steadily 24 hours a day**. A reduced effect of the functioning of a MIK energy plate can occur due to physical damage to the plate.

**The effect** of MIK energy plates **does not depend on the size of the plate itself**, but exclusively on the programme that the plate carries. The effect of MIK energy plates is thus provided with the inscription found on their surface and not with the size, so a larger energy plate does not have a larger effect.

100% GUARANTEE

# Should you be unsatisfied with your MIK energy plate, we will refund your money!

Take a picture of your plants before installing your MIK energy plates and then again after a month and compare the two photos. If you notice no difference in the plants, or if your well-being has not improved after a month, you can simply return the plate and we will refund you the full purchase price of the MIK energy plates!

## *Install it quickly and sleep great... Try it and see for yourself!*

**Branko Žunec,** business owner and director

*»As the owner and director of a business, I have a demanding job that requires 100% concentration and a lot of energy. Ever since I installed a MIK energy plate in my bedroom,* ***I sleep no more than 6 hours, yet wake up full of energy and completely rested.*** *Before installing the plate, I used to sleep between 6 and 7 hours, sometimes more in order to feel rested enough. Now I save up to 5 hours per week that I can spend on reading, strengthening my physical fitness or preparing for a new working day. As I travel a lot and often stay in hotels, I carry a spare energy plate. I have found that when I sleep at a hotel without the plate, I wake up less focused and less rested, so I now leave nothing to chance. Install it quickly and sleep great... That's all!* ***All I have to say is: try it and see for yourself.****«*

## *Exercise and physical activity are not enough; I use an integrated approach to a healthy lifestyle.*

**Biljana Zgonjanin,** Zumba instructor

*»I like to lead an active and dynamic lifestyle. In addition to my regular work duties, I spend most of my free time dancing, and lately, zumba is my great passion. This is an* ***energetic and fun exercise*** *that requires a lot of energy and concentration, which has* ***required no great effort from me*** *since I installed the energy plate in my home. To live healthily means to take care of the body and mind in an integrated way, to be calm and relaxed even after strenuous activities.* ***With the MIK energy plate, I calm down quicker and my body is vitalised much faster after exertions, so I now feel better and more full of energy.****«*

## *My workday is much less strenuous, and I come home full of energy!*

**Milka Cizelj,** director of a retirement home

*»As an executive director, I perform demanding and often strenuous work. Since my workspace is equipped with a MIK energy plate,* ***my workday is much less strenuous, I am relaxed and creative all day long and I return home full of energy.*** *My plants also thrive and give me much pleasure. That is why I have decided to have MIK energy windows installed in my home, as well.«*
