ARTGLASS AR 70

To je nevidno, prosojno in antizrcalno steklo. Zmanjšuje odsev na manj kot 1% in omogoča ogled umetnine kot je bilo predvideno - prikazuje prave barve brez izkrivljanja. ARTGLASS ima minimalno 70% UV filtriranje. Indeks prosojnosti je 99%. Enostavno za rokovanje. Gladka površina je enostavna za čiščenje, s trajno odporno prevleko proti praskam. Ne potrebujemo posebnih čistil in obe strani stekla imata enake lastnosti, tako da se lahko pred umetnino postavi z obeh strani.

Pakiranje je:

- majhen format - 6 plošč v kartonu - 800 x 1100 mm,
- velik format - 4 plošče v kartonu - 1100 x 1600 mm
- debelina je 2 mm

ARTGLASS AR 70

This is invisible, water-white and antireflective glass. Reduces reflections to less than 1% and allows viewing of artwork as intended - showing true colours without distortions. ARTGLASS has 70% UV filtering. Light transmission index is 99%. For ease of handling, the smooth surface is simple to clean, with a durable and scratch resistant coating. No special cleaning products are required and both sides of the glass hold the same properties, so either side can be placed against the art.

The packing is:

- small format - 6 sheets in carton - 800 x 1100 mm,
- big format - 4 sheets in carton - 1100 x 1600 mm
- thickness is 2 mm

“CHOP” SERVIS - PREDPRIPRAVA za uokvirjanje

Zakaj chop servis?

- svojim strankam lahko ponudite večji izbor letvic
- ne večate svojih zalog
- prihranite na prostoru za skladiščenje
- manj možnosti poškodb zaradi nepravilnega skladiščenja
- manj neuporabnih ostankov
- zmanjšate stroške dela, el. energije, brušenja, ...
- skrajšate čas zaključnih del

Kako deluje chop servis?

Pri nas naročite letve že odrezane na pravo dimenzijo, sami okvir samo še sestavite in zaključite. Lahko pa Vam ga sestavimo tudi mi.

Koliko vas stane dodatna storitev?

V ceniku, ki vam je na voljo v naši poslovalnici, so navedene vse cene, in sicer je v prvem stolpcu cenika navedena cena z vključeno storitvijo v eur/m, v drugem je navedena vrednost dodatka za razrez in v tretjem stolpcu je naveden dodatek za razrez s spajanjem za kos.

Pri izračunu končne cene morate upoštevati zunanjo mero okvirja.

Naročila sprejemamo samo v pisni obliki. Rok izdelave je 2 delovna dneva.

Pisno naročilo mora vsebovati:

- artikel
- notranjo fiksno mero
- število kosov posameznega artikla
- kontakt

“CHOP” SERVICE - PRE-PREPARATION for framing

Why chop service?

- You can offer to your customers a greater range of moldings
- No need to increase your stock
- Save on storage space
- Less chance of damage due to improper storage
- Less useless waste
- Reduce labor costs, electricity, grinding, ...
- Reduce finishing time

How does the chop service work?

You order the moldings already cut to the right dimensions from us, and you just have to assemble and finish the frame. Or we can assemble it for you.

How much does this additional service cost?

All prices are listed on our price list which is available at our offices: in the first column of the price list there is the price with the included service in eur/m, in the second column there is the value of the additional cutting service and in the third column there is the value of the additional cutting and joining service for each item.

In calculating the final price you must take into account the overall external dimensions of the frame. Orders are only accepted in writing. Production deadline is 2 working days.

Written order must include:

- Item
- Internal minimum measure
- Number of pieces of each item
- Contact
